Beckhoff Automation

Beckhoff Automation

This is how a POU written in the LD appears in the TwinCAT PLC Control editor: POU in the Ladder Diagram. All editors for POU consist of a declaration part and a body. These are separated by a screen divider. The LD editor is a graphic editor. The most important commands are found in the context menu (right mouse button or <Ctrl>+<F10>).

Programming Languages. TwinCAT PLC Control supports all IEC 61131-3 languages. There are two textual languages and four graphical languages. textual languages. Instruction List (IL) Structured Text (ST) graphical languages. Function Block Diagram (FBD) Ladder Diagram (LD) Continuous Function Chart (CFC) Sequential Function Chart (SFC)

Programming Languages - Beckhoff Information System

In the MAIN program block, which was created by default, you now describe the main function of the PLC program: The compressor becomes active and cools if the actual temperature is higher than the set temperature plus a hysteresis. The compressor is switched off when as the actual temperature is lower than the set temperature minus the hysteresis.

Your first TwinCAT 3 PLC project - Beckhoff Automation

TwinCAT PLC Control is a complete development environment for your PLC. TwinCAT PLC Control puts a simple approach to the powerful IEC language at the disposal of the PLC programmer.

Use of the editors and debugging functions is based upon the proven development program environments of advanced programming languages.

Beckhoff Information System - English

IEC 61131-3 – advanced programming standard for all Beckhoff controllers. The TwinCAT PLC is programmed in accordance with IEC 61131-3 independently of the manufacturer. TwinCAT supports all the IEC 61131-3 programming languages with convenient editors and a fast, effective compiler, so that the development cycle for the creation even of large PLC programs of several megabytes can be short.

BECKHOFF New Automation Technology

The TwinCAT Software System turns any compatible PC into a real-time controller with a multi-PLC system and NC/CNC axis control. At the same time, TwinCAT integrates the programming environment for all Beckhoff controllers: from high-end Industrial PC control to embedded controller
