Golf Club Distances: How Far Should You Hit Your Clubs?

Chart Showing Golf Club Distances. This chart lists the expected average golf club distances for each club based on varying swing speeds for men and women. The first number is for lower-speed swingers (less than 85 mph with the driver), followed by medium (86-104 mph) and high-speed (105+ mph) swingers.

Golf Club Distances - Golf Info Guide

Golf rules dictate that you may only carry a maximum of 14 clubs for a round of golf. You will normally have a driver, a fairway wood or two, possibly a few hybrids, your irons, wedges, and a putter. What this means is that you have to understand each club in your arsenal and know the distance they can deliver.

Golf Club Distances - How Far? [WITH DISTANCE TABLE]

To choose irons for your height, Golf Monthly recommends using the golf club size guide below: 6ft 9" - 7ft 0" Add 2" to Standard Length 6ft 6" - 6ft 9" Add 1 1/2" to Standard Length 6ft 3" - 6ft 6" Add 1" to Standard Length

Quick Golf Club Size Guide for Beginners - Golfsupport Blog

Manufacturers usually make clubs to account for golfers anywhere between 4'8" to 6'7" inches tall. The second measurement is wrist-to-floor distance. This is done by standing on a flat surface with your arms relaxed and pointing down. You then measure the distance between the ground and the line where your wrist meets your hand.

you. For example, if you are 6 feet tall and your wrist-to-floor measurement is 39 inches, you will likely find it beneficial to add 1.5 inches to the standard length of any golf club.

Standard Length of Golf Clubs for Women and Men | SportsRec

Note: Club length alterations given are in inches. For example, +1.75" means that your clubs should be made to be 1.75" longer than standard length. A -0.5" instructs us to build your clubs to be 0.5" shorter than standard length. And a S means that the proper club length for you is Standard. Use the Chart to determine how much longer or shorter (than standard) your club length should be by ...

GOLF CLUB SIZING INFORMATION - AGXGOLF.COM

The more angle on the club face, the greater the potential loft of the club. For example, a driver is designed for distance, so the club face is almost straight up and down. This causes only an 8-13 degree loft. In comparison, a pitching wedge is designed for loft, so the club face is more parallel to the ground, with a 47-53 degree loft.

What Is the Average Distance With Each Golf Club ...

Clubs other than drivers gradually get shorter -- if a 44-inch steel shaft driver is indicated by the chart, your 5-iron will measure 38 inches and sand wedge 35.5 inches. Graphite clubs are slightly longer, with a standard driver at 45 inches, 5-iron at 38.5 inches and a sand wedge 36 inches.

Length of Shafts According to Height in Golf | SportsRec

Golf Club Distance Calculator. Golf Club Distance Theory: Required Data Entry ... You will also see that based on ability and size, iron distances vary, in some cases significantly. Better players tend to strike irons at the correct impact angle more often than higher handicap players. Higher handicap players often hit 7, 8 and 9 irons for ...
