1st Workshop on Post-Editing in Modern-Day Translation ...

Machine translation (MT) is continuously improving by becoming faster, cheaper, and more accurate. Yet it still has some way to go before it achieves parity with human translators. Post-editing machine translation (PEMT) helps combine the best of both worlds: the speed and ability of MT engines to quickly handle large volumes of text, with the skill and sensitivity of trained linguists.

Hi all, I am curious to know the status of machine translation post editing in your country, in particular with reference to whether it's part of translation studies at the university or not. In Italy it seems we are a bit late from this point of view and many new translator have never heard of such a service. Thanks in advance for your contribution!

Machine Translation Post Editing - recruiting | GALA Global

Translation companies use MT to augment productivity of their translators, cut costs, and provide post-editing services to clients. MT use by language service providers is growing quickly. In 2016, SDL—one of the largest translation companies in the world—announced it translates 20 times more content with MT than with human teams.

What is Machine Translation? | GALA Global

The obvious post-editing environment seems to be a translation memory (TM) system, but it is intended for a slightly different purpose and it needs to be directly linked to the MT engine in order to facilitate post-editing work (e.g. by avoiding rework on inline tags).

What is Post-Editing and Why is It So Hard? | GALA Global

Machine Translation Post-Editing Is Not As Important As You Think Recently, Moravia joined some of the best and brightest of the language services industry for a GALA webinar called Translation Trends for 2015.

Machine Translation Post-Editing Is Not As Important As ...

Post-editing means that a human translator is editing or revising text that has been translated by machine translation software. Post-editing replaces conventional translation for MT projects. It is a skill that translators develop with time and experience - there is a learning curve associated with PE.

Post-Editing Machine Translation Training - SDL

PEMT (post-editing machine translation) is a feature that we implemented a few months ago in some language pairs as a way to leverage technology to make the translation process more efficient while increasing consistency and quality. In jobs with PEMT enabled, the target section is pre-filled with a machine suggestion, which we expect you to use as a reference to make appropriate edits when ...

What is Post-editing Machine Translation (PEMT)? - Support

Machine Translation (MT) Post-Editing Instructions Updated : July 21, 2020 17:38 Created : June 08, 2020 10:47 The main objective of post-editing is to make the machine-translated output sound natural in the target language, understandable and grammatically correct, and to fully convey the meaning from the source text.

Machine Translation (MT) Post-Editing Instructions ...

Post-editing (or postediting) is the process whereby humans amend machine-generated translation to achieve an acceptable final product. A person who post-edits is called a post-editor. The concept of post-editing is linked to that of pre-editing. In the process of translating a text via machine translation, best results may be gained by pre-editing the source text – for example by applying the ...
