The Splicing Handbook, Third Edition ... - R&W Rope

Splicing that type of rope and cord is relatively straightforward. Nowadays the most common type of rope used on board yachts, dinghies, motorboats, working boats and ferries is braided rope. Few people have the knowledge to splice it, or even where to start. Splicing Modern Ropes is the first guide to this essential skill.

Splicing Modern Ropes | A practical handbook published by ...

General Splicing Tips Tools Required Whipping Rope Handling Use Rope Broom Handle Pull rope from reel directly, not from side. To avoid kinking, coil rope in figure eight for storage or take on deck. Soaking the section of used rope to be spliced in water will loosen and lubricate the fibers and make the splice easier to perform.

SPLICING GUIDE - New England Ropes

A splice is a way of terminating a rope or joining two ends of rope together without using a knot. Apart from being bulky and unsightly, even a correctly tied knot can cause significant loss of strength to a rope.

Splicing Instructions | Marlow Ropes

Samson recommends splicing as the preferred rope termination method. Knots can significantly decrease a ropes strength while, in most cases, splicing maintains 100% of the specified rope strength. Splice terminations are used in all our ropes to determine new and unused tensile strengths.

How to Splice Rope - Samson Rope

Splicing modern braided ropes of super fibres is quite fun and easy to learn. Premiumropes has uploaded various splicing tutorials, such as eye-splices, soft shackles, taper sheets or make a continuous furler line. Make sure you have enough space to work and an anchoring point for your rope.

Splicing instruction videos - learn how to splice ropes

The Sliding Splice is the exception. We created it to make a Sailor's Rope Belt - for which it is well suited - and was never intended to take a critical load. Some workers installing electricity cables, however, have reported using the same splice to haul cables through buried pipes. Appropriate Splicing Techniques

The Splicing Handbook: Techniques for Traditional and ...

Rope splicing in ropework is the forming of a semi-permanent joint between two ropes or two parts of the same rope by partly untwisting and then interweaving their strands. Splices can be used to form a stopper at the end of a line, to form a loop or an eye in a rope, or for joining two ropes together.

Rope splicing - Wikipedia

These will vary according to the type of rope being spliced. The splicing fid is a traditional tool to make openings beneath the strands of twisted or square plaited ropes. Braided ropes are spliced using a fid and pusher. The fid works like a large sewing needle: it stiffens the rope end to allow it to be pulled
